Information Technology

Highway Transport provides the latest technologies and web-based tools for customer convenience.

- Increased productivity, security, mobility and collaboration
- Data management
- Operational efficiencies, resource utilization, customer communication and driver safety

We offer EDI communication, as well as web services, through partners such as Four Kites and MacroPoint.

MY HIGHWAY Customer Portal

Through the newly enhanced customer portal, Highway Transport provides customers with:

- Order information
- Real time tracking of cargo
- Document retrieval
- Real time tracking of cargo temperature
